

What is MSV Consulting ?

It has never been more important to ensure IT systems are designed to promote growth, reduce costs and enable better productivity. Invest in the wrong technology and a business could find itself at a competitive disadvantage. Finding the right solution can be difficult, confusing and expensive.

That's where MSV Consulting can help.

Auditing and health checks are used to identify risk and opportunity, and recommendations are made to meet business goals and objectives. Management is carried out by a team of dedicated experts with the expertise and knowledge to handle the planning, delivery and installation of projects ranging from one-off assignments to large-scale operational change.

"We were very impressed with MSV as a group of people - they clearly knew the technology and they weren't, pushy salespeople. They offered us an excellent service at a compelling price, then delivered."

Steven Birch, Financial Director - JPE Holdings Ltd of Wolverhampton

IT Services You Can Trust

BUSINESS TRANSFORMATION

When implementing change, it is important to ensure that IT systems are fit for the future. MSV Consulting offers a range of services including state-of-the-art telecommunications solutions, backup and disaster recovery. IT health checks are a cost-effective way of identifying improvements and planning for growth, so that savings can be made, productivity improved, and operations can be transformed for the better.

AUDIT AND HEALTH CHECKS

A health check isn't just about identifying problems but spotting opportunities and optimising performance. Thorough and careful auditing takes into account business goals and shows ways to get the most out of IT. Additional software, services and systems are recommended only if offering real long-term benefits – so that tech can become a support, rather than a hindrance.

VIRTUAL IT DIRECTOR

A Virtual IT Director offers business the support needed to navigate change. Advice is designed to show where efficiencies and improvements can be made, while new software and systems are recommended with long-term objectives in mind. Professional IT consulting will identify the necessary features and deliverables from technology to take business to the next level.

INSTALLATION AND DELIVERY

Planning, installation, delivery and sign-off are handled with expertise and good judgment from beginning to end. Upgrades are implemented seamlessly and smoothly, and business continuity is a priority. Training and bespoke courses ensure staff are confident and equipped to handle change. Meanwhile, ongoing support packages provide continuing peace-of-mind and proactive maintenance.

SOLUTION DESIGN

From creating IT infrastructures to support growth, to the development of better security measures and more efficient ways of working, MSV Consulting provides only the very best outcomes for clients. Streamlined processes and future-proof communications systems produce leaner productivity and reduced costs. Cloud computing enables workspace mobility, while bespoke software can cut overheads and improve customer service.

PROJECT MANAGEMENT

Project management is based on solid strategy and a belief that tech should prepare business for the future. Objectives, goals and needs are carefully considered before the very best solutions are designed and delivered. Clients are kept informed throughout the process, making sure that deadlines are met, and projects achieved within budget. Ongoing maintenance and support from a team of dedicated experts is on hand if required.

MSV
CONSULTING™

How Can MSV Consulting Help You ?

ENTREPRENEURS AND MICROBUSINESSES

Getting the right IT system in place can be a challenge for many micro enterprises. MSV Consulting can advise on the best ways to harness tech for growth, security and improved efficiency.

Affordable and transparent pricing allows effective budgeting, without the worry of spiralling costs.

SMALL AND GROWING BUSINESSES

Having access to the right people with the right level of expertise can make all the difference to the success of an IT project. For a business ready to embark on the next chapter of success, deciding on what software and systems to implement can prove difficult, time-consuming and costly.

Choosing the best IT partner for advice and consultation eliminates worry and adds value

ESTABLISHED COMPANIES

Sometimes even the most established of IT departments need a helping hand. Whether a client is looking to complement an existing team or needs a fully outsourced provider to plan a complex project, MSV Consulting delivers.

Full training and support means that any change takes place with minimal disruption to day-to-day business operations.
