

# CLOUD BACKUP & DISASTER RECOVERY™

FROM **MSV** CONSULTANCY

## What is MSV Cloud Backup & Disaster Recovery ?

Today, organisations have an incredibly low tolerance for the unavailability of business-critical systems and data. However, they are under the shadow of constant peril, due to disruption from power and hardware failures, human errors, stolen services, malicious attack, Acts of God and Force Majeure. **Could you afford to lose critical data? Would you want to pay a ransom?**

Our Business Continuity services comprises strategies, infrastructure and services that enable businesses to operate with minimal or no disruption or service outage whether you are hit by a major incident or you just need to take your environment offline for a while.

### BACKUP & RESTORE

Whether you're a mobile business that's heavily reliant on your trusty laptop or a large enterprise with a sophisticated IT environment and a diverse workforce, backup is the critical first step to protect your business.

### DISASTER RECOVERY

Our Disaster Recovery services Backup and Restore services and provide the ability to rapidly restore the data and applications that run your business, in the event of a disruption to these services.

### BUSINESS CONTINUITY

Supporting organisations with very low tolerance for the unavailability of business-critical systems and data. We completely replicate your systems and data enabling your business to continue operation regardless of the disrupting event.

### BCDR CONSULTANCY

Backup Heroes BCDR consultancy services ensure that your BCDR plans fully reflect the individual needs of your organisation and prepare your business to survive and prosper if exposed to data and system related disruption.

- Backup compliance reporting
- Built-in deduplication and compression
- Built-in end-to-end AES 256-bit encryption

## How Can MSV Cloud Backup & Disaster Recovery Help You ?

### ENTREPRENEURS AND MICROBUSINESSES

Starting a business isn't easy and we sometimes need to put cost before quality. Protecting your data from things like a dead laptop is key to your business survivability and it will only cost as much a month as you spend on Coffee!

### SMALL AND GROWING BUSINESSES

As businesses grow they're tolerance for business-critical systems and data outages disappears. With the growing prevalence of malware and ransomware and their potentially devastating impact on companies, a sound Backup and Disaster Recovery plan is essential to survive and prosper should the worst happen.

### ESTABLISHED COMPANIES

Disruption from power and hardware failures, human errors, stolen services, malicious attack, Acts of God and Force Majeure all threaten to disrupt day to day operation, potentially impacting revenue and reputation; , a sound Backup and Disaster Recovery plan is essential.
